SUBJECT INDEX

ABLATION
Ablative Coatings For Structural Fire Protection, 558

ABSTRACTS
Information Retrieval for Soil Engineers, 376

ACCELERATION
Added Mass of Equilateral-Triangular Cylinders, 927

ACTIVATED SLUDGE PROCESSES
Biodegradation of Malathion, 194
Microbial Substrate Storage in Activated Sludge, 400
Specifying and Evaluating Aeration Equipment, 490

AERATION
Improving Aeration at an Underflow Dam, 282
Specifying and Evaluating Aeration Equipment, 490

AERATION TANKS
Iron-59 as Solids Tracer in Aqueous Suspensions, 954

AERODYNAMICS
Verrazano-Narrows Bridge: Design of Superstructure, 463

AERO-SPACE TRANSPORT
Airport Take-off and Landing Paths, 14
Air Transportation in Philadelphia, 881
Design of the Saturn V Mobile-Launcher, 638
Jumbo Jets and SST's: Will Airports Be Able to Handle Them, 269
Landing Area Facilities, 481
The Mobile Concept in Launch Facilities, 62
New Airport Terminal Concept, 84
Second Space Age Facilities Conference, 720

AGGREGATES
Statistical Quality Control in Highway Construction, 838

AGRICULTURE
Irrigation in the Future, 872

AIRCRAFT
Airport Take-off and Landing Paths, 14
Jumbo Jets and SST's: Will Airports Be Able to Handle Them, 269
Landing Area Facilities, 481
Timing is Key to Boeing 747 Project, 807

AIR ENTRAINMENT
Deterioration of Concrete in Eisenhower Lock, 172

AIR POLLUTION
Air Quality Control and Source Emissions, 170
Carbon Dioxide as an Indicator of Air Pollution, 890
The Greater Pittsburgh Renaissance Program, 742
High-Altitude Multiple-Vehicle Emission Tests, 877
Local, Regional, and State Air Pollution Control, 311
Report on the Solid Waste Problem, 800

AIRPORTS
An Airport in Lake Michigan for Chicago?, 801
Air Transportation in Philadelphia, 881
Jumbo Jets and SST's: Will Airports Be Able to Handle Them, 269
Keeping Ice Off Runways, 1
Landing Area Facilities, 481
New Airport Terminal Concept, 84
Rigid Pavement Maintenance for Airfields, 494
The Satellite Airport System and the Community, 650

ALFALFA
Spring Soil Temperatures Related to Drainage Problems, 267

ALGAE
Predicting DO Variations Caused by Algae, 837

ALGEBRA
A Graphical Method for Finding the Real Roots of n-th Order Polynomials, 137

ALGORITHMS
Critical Path Resource Scheduling Algorithm, 829

ALINEMENT
Construction Control with Lasers, 317

ALUMINUM
Behavior and Maximum Strength of Metal Columns, 221
Inelastic Behavior of Structural Frameworks, 41
Optimum Design of Tubes for Bending and Torsion, 542
Stability of Strain-Hardening Tubular Columns, 901

ANALOGS
Elasto-Plastic Bending of Rectangular Plates, 230
Electrical Analog Simulation of Plastic Structures, 279
Graphical Statistics and Common-Sense Applications, 526
Snake Plain Analog Studies, 202

APARTMENT BUILDINGS
Behavior of Structures in the Caracas Earthquake, 54
New Technology in Low-Income Housing?, 31

AQUATIC PLANTS
Effects of Impoundments on Water Quality, 143

AQUEDUCTS
Optimizing Conveyance Systems for Water Treatment, 640
Cement Mortar Lining of Large Diameter Water Pipelines, 768
Steel Pipe Design for the Second Los Angeles Aqueduct, 180

AQUIFERS
Snake Plain Analog Studies, 202
Unconfined Aquifer Characteristics and Well Flow, 262

ARCH BRIDGES
The World's Greatest Bridges, 756

ARCHES
Analysis of Continuous Arch Frames, 349
Inelastic Buckling of Shallow Arches, 504
Program for Yield-Point Load of Arches, 573

ARCHITECTURE
Aesthetics of Highway Bridges, 560
L'Enfant Plaza: Structure Does Double Duty as Air Distribution System, 723

ASCE (Activities)
The ASCE Voluntary Fund, 705

ASCE (Awards and Prizes)
The Greater Pittsburgh Renaissance Program, 742
National Historic Civil Engineering Landmark Program, 956

ASCE (Career Guidance)
The ASCE Voluntary Fund, 705

ASCE (Conferences)
Civil Engineering in the Oceans, 726
Second Space Age Facilities Conference, 720

ASCE (OCEA Awards)
First Orthotropic Bridge Deck Paved with Epoxy Asphalt, 367
World's Longest Orthotropic Section Feature of San Mateo-Hayward Bridge, 349
Madison Coliseum Pays Out Quickly, 620
(ASCE) Outstanding Civil Engineering Achievements, 958

ASCE (Voluntary Fund)
The ASCE Voluntary Fund, 705

ASPHALTS
Asphaltic Concrete Facing for a Rock-Fill Dam, 182
Brazilian Link in Pan-American Highway, 747
First Orthotropic Bridge Deck Paved with Epoxy Asphalt, 367
Membrane Linings for Canal Construction, 328
Upgrading Intersections for Safety, 66

AUDITORIUMS
Madison Coliseum Pays Out Quickly, 620

AUTOMATION
Optimizing Conveyance Systems for Water Treatment, 640
Water Line Transmission of Control Information, 946

AUTOMOBILES
$1 Billion R&D Program for Urban Transportation Proposed, 687

AWARDS
Ardrossan Bridge Employs Precast Prestressed Components, 156

BARGES
Mathematical Model of Barge Tow Performance, 320
Sludge Disposal at Sea, 575

BARRIERS
Safety Features on Freeways, Part II, 793
Safety Hardware on Freeways, Part I, 771

BARS
Stability of a Bar Under Eccentric Follower Force, 330

BASE FLOW
Free-Aquifer Ground-Water Depletion Hydrographs, 103

BEACHES
Mechanism of Sand Movement on Coastal Dunes, 797
Variations in Groin Design, 528

BEAM COLUMNS
Analysis of Restrained Columns Permitted to Sway, 177
Creep of a Cracked Reinforced Beam, 579
Design of Steel-Encased Concrete Beam-Columns, 631
Elastic Stability of Tapered Beam-Columns, 225
Seismic Resistance of Reinforced Concrete Beam-Column Joints, 389
Strength of Steel-Encased Beam Columns, 354

BEAMS (Supports)
Beam Tests with Unreinforced Web Openings, 408
Bending Behavior of Composite Hybrid Beams, 621
Circular-Arc-I-Type Girders, 696
Composite Beams with a Hybrid Tee Steel Section, 95
Creep of a Cracked Reinforced Beam, 579
DEF Analogy for Analysis of Box Girders, 611
Deflection Coefficients for Steel Beams, 774
Design of Foundations Under Differential Settling, 684
Design of Steel Frames for Minimum Weight, 614
Diagonal Cracking in Prestressed Concrete Beams, 410
Edge Beam Stiffening of Multibeam Bridges, 164
Elastic Lateral Buckling of Continuous Beams, 362
Elasto-Plastic Response of Timoshenko Beams, 47
Equivalent Uniform Load for Beam Deflection, 731
Experimental Stresses in Wide-Flange Beams with Holes, 85
Layered Beam Systems with Interlayer Slip, 947
Limit Analysis of Continuous Prestressed Beams, 289
Member Selection Commands for Structural Design, 298
Moment-Curvature of Beams as Ramberg-Osgood Functions, 907
Multibeam Bridges with Elements of Channel Section, 397
Natural Frequencies of Horizontally Curved Beams, 104
Numerical Analysis of a Beam Under Tension, 598
Optimum Design of Beams for Sudden Loading, 943
Optimum Design of Tubes for Bending and Torsion, 542
Reinforced Concrete Beams Subjected to Repeated Loads, 415
Resonance of Beams Due to Cyclic Moving Loads, 74
Roof-Structure Roof-Drainage Interaction, 822
Shakedown Analysis of Nonprismatic Beams, 284
Shear Buckling of Unstiffened Hybrid Beams, 348
Staggered Wall Beams for Multistory Buildings, 622
Steady State Vibration of Damped Timoshenko Beams, 274
Stress Concentration in Timber Beams, 347
Torsion in Sections with Open and Closed Parts, 531
Ultimate Strength of Beams with Rectangular Holes, 666
Ultimate Torque of Reinforced Rectangular Beams, 935
Upper and Lower Frequencies of Tapered Beams, 609

BEARING CAPACITY
Bearing Capacity of Footings on Layered Clays, 277
Pile Load Capacity: Estimates and Test Results, 120
Predicting Safe Capacity of Pile Groups, 819
Railroad Damage in the Alaska Earthquake, 94

BED FORMS
Nomenclature for Bed Forms in Alluvial Channels, 478

BED LOAD
Dominant Discharges at Platte—Missouri Confluence, 895
Depositional Behavior of Kaolinite in Turbulent Flow, 928

BIBLIOGRAPHIES
Abstracted Bibliography on Erosion of Cohesive Materials, 342
Information Retrieval for Soil Engineers, 376
List of Sources of Information on Pipeline Design, 653

BIDS
Unbalanced Bidding Models—Theory, 770

BITUMINOUS CEMENTS
Brazilian Link in Pan-American Highway, 747

BLASTING
Air-Bubble Curtain in Sub-Aqueous Blasting at Muddy Run, 661
Controlled Blasting Near Nuclear Reactor, 4
Effects of Blasting Vibrations on Buildings and People, 645

BOLTED JOINTS
A514 Steel Joints Fastened by A490 Bolts, 802
Bolted Joints with Oversize or Slotted Holes, 548

BOLTS
Bolted Joints with Oversize or Slotted Holes, 548
Bolted Joints with Plates of Different Thickness, 811
Tests of Bolted Butt Splices, 942

BORING
Soft-Ground Tunnels for BART, 465

BOX GIRDERS
BEF Analogy for Analysis of Box Girders, 611

BREAK-AWAY SIGNS
Safer Roadside Signs—Testing and Instrumentation, 193

BREAKWATERS
Dolos Concrete Armor Protection, 840

BRIDGE ANCHORAGES
Newport Bridge Foundations, 816
Verrazano-Narrows Bridge: Design of Tower Foundations and Anchorages, 851

BRIDGE DECKS
First Orthotropic Bridge Deck Paved with Epoxy Asphalt, 367

BRIDGE PIERS
Ardrossan Bridge Employs Precast Prestressed Components, 156
Newport Bridge Foundations, 816
World's Longest Orthotropic Section Feature of San Mateo-Hayward Bridge, 349
The Yellow Book Means Safer Highway Structures, 767

BRIDGES
Aesthetics of Highway Bridges, 560
Ardrossan Bridge Employs Precast Prestressed Components, 156
New Bridges Founded on Old, 785
Pennsylvania's Highest Bridge, 511
Random Response of Highway Bridges to Vehicle Loads, 11
Remington's Wood Bridges, 307
Second-Order Theory in Orthotropic Plates, 361
World's Longest Orthotropic Section Feature of San Mateo-Hayward Bridge, 349

BRIDGES (Steel)
Pennsylvania's Highest Bridge, 511
Trends in the Design of Steel Box Girder Bridges, 5

BRIDGES (Structures)
The BEST Approach to Engineering Design, 682
Bibliography on Chemical Grouting, 476
Dynamic Response of a Horizontally Curved Bridge, 523
Edge Beam Stiffening of Multibeam Bridges, 164
Multibeam Bridges with Elements of Channel Section, 397
Multispan Suspension Bridges Under Lateral Loads, 399
Optimum Design of Mixed Steel Composite Girders, 861
Railroad Damage in the Alaska Earthquake, 94
Shakedown Analysis of Nonprismatic Beams, 284
Stress Histories of Highway Bridges, 931
Suspender Tension Method for Bridge Analysis, 386
Verrazano-Narrows Bridge: Conception and Construction Procedure, 466
Verrazano-Narrows Bridge: Design of Superstructure, 463
Verrazano-Narrows Bridge: Design of Tower Foundations and Anchorages, 851
Verrazano-Narrows Bridge: Fabrication and Construction of Superstructure, 851
Wood Research in the Railroad Industry, 68
The Yellow Book Means Safer Highway Structures, 767

BUCKLING
Buckling of Elastic-Plastic Tubular Columns, 230
Elastic Buckling of Plate Girders from Pure Bending, 603
Elastic Lateral Buckling of Continuous Beams, 362
Elastic Stability of Tapered Beam-Columns, 225
Experiments on H-Columns under Biaxial Bending, 913
Finite Deformations of Shallow Shells, 924
Finite-Element Elastic Buckling Analysis, 130
Frame Analysis Including Change of Geometry, 602
Inelastic Buckling of Shallow Arches, 504
Inelastic Torsional Buckling of H-Columns, 707
Large Deflections and Stability of Elastic Frames, 704
Optimum Design of Eccentrically Loaded Columns, 430
Optimum Design of Tubes for Bending and Torsion, 542
Postbuckling Behavior of Thin Cylinders, 404
Shear Buckling of Unstiffened Hybrid Beams, 348
Stability of a Bar Under Eccentric Follower Force, 330

BUILDING CODES
New Building Code of New York, 730
Ultimate Torque of Reinforced Rectangular Beams, 935

BUILDINGS
602-Ft-High Lightweight Concrete Building in Australia, 831
Annular Slabs in Circular Core Buildings, 271
BART Tube Ventilation Building, 751
Building-Foundation Interaction Effects, 644

The Case for Evaluating Performance of Structures, 273
Cost of Concrete Industrial Buildings, 46
Distribution of Crane Forces in Mill Buildings, 507
Dynamic Characteristics of Multistory Buildings, 632
Dynamic Safety Analysis of Multistory Buildings, 248
Full-Scale Structural Testing and the New York World's Fair, 713
Kinetic Structures, 917
Optimization of Wind Bracing in a Tower, 832
Precast Boxes Stacked to Build 496-Room Hotel in Nine Months for HemisFair, 283
Timing is Key to Boeing 747 Project, 807

BULKHEADS
Waterfront Development for New Cement Plant, 412

BUSES (Vehicles)
$1 Billion R&D Program for Urban Transportation Proposed, 687
Analysis of a Freeway Bus Transit System, 405

BUTT JOINTS
Tests of Bolted Butt Splices, 942

CABLES
Analysis of Multispan Suspension Bridges, 787
General Solution of Suspended Cable Problems, 119
Multispan Suspension Bridges Under Lateral Loads, 399
Numerical Solution of Nonlinear Structures, 364
Shear-Volume Method of Solving Tensions in Cables, 830
Suspender Tension Method for Bridge Analysis, 386
Verrazano-Narrows Bridge: Design of Superstructure, 463
Verrazano-Narrows Bridge: Fabrication and Construction of Superstructure, 851

CAISSONS
BART Tube Ventilation Building, 751
Newport Bridge Foundations, 816

CANAL LININGS
Failure Mechanism of Canal Lining in Expansive Clay, 115

CANALS
Construction Planning for a Sea-Level Panama Canal, 543
Economic Problem of Irrigation Canals: Seepage Losses, 447
Failure Mechanism of Canal Lining in Expansive Clay, 115
Hydraulic Assistance on the Welland Ship Canal, 568
Membrane Linings for Canal Construction, 328

CANTILEVER BRIDGES
The World's Greatest Bridges, 756

CATTLE WASTES
Cattle Wastes—Pollution and Potential Treatment, 332

CAVITATION
Glen Canyon Dam Diversion Tunnel Outlets, 369
Review of Cavitation Research on Valves, 212
Some Analytical Results for Plane 90° Bend Flow, 505
Sudden-Enlargement Energy Dissipator for Mica Dam, 439

CEILINGS
L'Enfant Plaza: Structure Does Double Duty as Air Distribution System, 723

CEMENTS
Deterioration of Concrete in Eisenhower Lock, 172
Effect of Compaction on Strength of Soil-Cement, 556
Statistical Quality Control in Highway Construction, 838
Waterfront Development for New Cement Plant, 412

CENTRIFUGAL PUMPS
Water-Hammer Control in Centrifugal Pump Systems, 417

CHANNEL STABILIZATION
Gabions—New Ideas for a Proven Device, 559

CHANNELS (Waterways)
Analysis of Resistance in Fluvial Channels, 435
Analysis of Submergence in Flow Measuring Flumes, 96
Control Point in a Lateral Spillway Channel, 315
Dominant Discharges at Platte-Missouri Confluence, 895
Efficiency and Stability of Forced Hydraulic Jump, 36
Flood Control Alternatives and Flood Insurance, 117
Flow Immediately Below Submerged Sluice Gate, 43
Free Surface Flow in Porous Media, 727
Generalized Profiles of Gradually Varied Flow, 319
Graphic Analysis of Waterway Capacity, 586
Mathematical Flow Determination in Open Channels, 686
Recirculation and Sand-Feed Type Flume Experiments, 393
Research for River Regulation Dike Design, 613
Seepage from an Array of Triangular Channels, 198
Subcritical Flow Over Highway Embankments, 82

CHANNELS (Waterways) *Continued*
Transitions in Supercritical Open-Channel Flow, 253
Variation of Alpha and Beta Values in a Lined Open Channel, 544

CHROMATOGRAPHY
Identification of Petroleum in Estuarine Waters, 726

CIVIL ENGINEERING
ASCE's Response to the Changing Times, 960
Benjamin Wright Named "Father of American Civil Engineering", 798
The Civil Engineer, ASCE and Community Affairs, 249
Civil Engineering in the Oceans, 726
Is Engineering Obsolete?, 77
Systems Engineering, 608

CIVIL ENGINEERS
1967 ASCE Salary Survey, 538
The Civil Engineer Can Improve His Public Image, 737
The Civil Engineering Challenge, 139
Role of the Civil Engineer in Metropolitan Planning, 803
The Technologist and the Practicing Profession, 293

CLAY (Material)
Bearing Capacity of Footings on Layered Clays, 277
Consolidation and Geochemistry of Some Clays, 501
Effects of Pile Driving on Soil Properties, 28
Failure Mechanism of Canal Lining in Expansive Clay, 115
Foundation Rebound at Dos Amigos Pumping Plant, 26
Local Geology and the Stability of Natural Slopes, 195
Some Clay-Slurry Friction Factors, 185
Stability of Natural Slopes in Sensitive Clay, 446
Stress History Effects on Dynamic Modulus of Clay, 288
Turnagain Slide Stabilization, Anchorage, Alaska, 876

COASTAL ENGINEERING
Beach Rehabilitation by Hopper Dredge, 906

CODES
Bonanza-Literature for Civil Engineers, 38

COEFFICIENTS
Mixing of Two Concentric Jets, 846
Synthetic Coefficients for Streamflow Routing, 164
Two-Dimensional Dispersion, 594
Variation of Alpha and Beta Values in a Lined Open Channel, 544

COFFERDAMS
Cellular Cofferdam Design and Practice, 880
Hydraulic Design of Dworshak Dam Diversion Facilities, 225
Surveys and Layout for TVA's Nickajack Project, 122

COLD WEATHER CONSTRUCTION
Asphaltic Concrete Facing for a Rock-Fill Dam, 182
Monopod, 183
Structures for a Small Arctic Surface Camp, 12

COLUMNS (Structural)
Analysis of Restrained Columns Permitted to Sway, 177
Behavior and Maximum Strength of Metal Columns, 221
Buckling of Elastic-Plastic Tubular Columns, 230
Design of Steel-Encased Concrete Beam-Columns, 631
Discrete Analysis of Latticed Columns, 61
Elastic Stability of Tapered Beam-Columns, 225
Experiments on H-Columns under Biaxial Bending, 913
Factors Effecting Seismic Design of Water Towers, 852
Finite-Element Elastic Buckling Analysis, 130
Inelastic Torsional Buckling of H-Columns, 707
Member Selection Commands for Structural Design, 298
Nature of Compression Failure in Wood, 147
Optimum Design of Eccentrically Loaded Columns, 430
Stability of Strain-Hardening Tubular Columns, 901

COMBINED SEWERS
Inventory of Combined Sewer Facilities, 680

COMMERCIAL BUILDINGS
Prefabricated Steel Buildings, 535

COMMUNICATION
Water Line Transmission of Control Information, 946

COMPACTING
Effect of Compaction on Strength of Soil-Cement, 556
Pipeline Economy Through Design of Backfill, 537
Statistical Analysis of Density Tests, 569

COMPOSITE CONSTRUCTION
Bending Behavior of Composite Hybrid Beams, 621

COMPRESSIBILITY
Deformations of Sand in Hydrostatic Compression, 454

COMPRESSION
Evaluation of Cougar Dam Embankment Performance, 750

COMPUTATION
Impact of Computers on Surveying Methods, 214

COMPUTERS
Analysis of Circular Steel Multistory Frameworks, 76
Analysis of Embankment Stresses and Deformations, 443
Analysis of Multispan Suspension Bridges, 787
Analysis of Structural Reliability, 360
Automatic Solution of Pucher's Equation, 57
AUTOSPEC: Automated Preparation of Specifications, 854
The BEST Approach to Engineering Design, 682
Computer Analysis of Underground Frames, 92
Computer-Determined Unit Hydrograph from Floods, 514
Computer Simulation of a Break-Away Sign Support, 207
Computer System for Analysis of Large Frameworks, 391
Design of Foundations Under Differential Settling, 684
Design of the Saturn V Mobile-Launcher, 638
Dynamic Characteristics of Multistory Buildings, 632
Electronic Computation: Past, Present, Potential, 860
Finite Element Approach to Stress Wave Problems, 69
Finite-Element Elastic Buckling Analysis, 130
Folded Plates Continuous Over Flexible Supports, 500
Frame Constant Matrices, 764
Freeway Ramp Control, 583
General Solution of Suspended Cable Problems, 118
A Heuristic Aid for the Design of Sewer Networks, 30
High-Speed Trains for Washington–New York Service, 320
Impact of Computers on Surveying Methods, 214
Improved Design of Fluid Networks with Computers, 291
Inelastic Buckling of Shallow Arches, 504
Long Nonprismatic Folded Plate Structures, 626
Multiple Folded Plates With Various End Conditions, 484
Multispan Suspension Bridges Under Lateral Loads, 399
A Nonlinear Hydrologic System Response Model, 381
Optimization of Wind Bracing in a Tower, 832
Optimum Design of Mixed Steel Composite Girders, 861
Processing Streamflow Data, 336
Releases and Constraints in Structural Networks, 437
Roof-Structure Roof-Drainage Interaction, 822
Second-Order Theory in Orthotropic Plates, 361
Seepage from an Array of Triangular Channels, 198
Solution of Estuary Problems and Network Programs, 313
A Solution to the Surface Runoff Problem, 668
Steady State Vibration of Damped Timoshenko Beams, 274
Unsteady Flow in Lines with Distributed Leakage, 430
Use of Computers for Slope Stability Analysis, 383
Water-Hammer Analysis of Distribution Systems, 777
Water Pressure on Dams Subjected to Earthquakes, 133

CONCRETES
602-Ft-High Lightweight Concrete Building in Australia, 831
Ardrossan Bridge Employs Precast Prestressed Components, 156
Asphaltic Concrete for a Rock-Fill Dam, 182
Behavior of Structures in the Caracas Earthquake, 54
Creep of a Cracked Reinforced Beam, 579
Design of Steel-Encased Concrete Beam-Columns, 631
Deterioration of Concrete in Eisenhower Lock, 172
Dynamic Loading of Several Concrete-Like Mixtures, 671
Earthquake Forces in Reinforced Concrete Chimneys, 245
Edge Beam Stiffening of Multibeam Bridges, 164
Engineering Close-Up of HemisFair 68, 306
Evaluation of Concrete for Desalination Plants, 238
Failure Mechanism of Canal Lining in Expansive Clay, 115
L'Enfant Plaza: Structure Does Double Duty as Air Distribution System, 723
Limit-Design Solutions for Concrete Structures, 155
New Bridges Founded on Old, 785
Recommended Practice for Manufactured Reinforced Concrete Floor and Roof Units, 337

CONCRETES *Continued*
Rigid Pavement Maintenance for Airfields, 494
Staggered Wall Beams for Multistory Buildings, 622
Statistical Quality Control in Highway Construction, 838

CONCRETE (Reinforced)
Design Charts for Reinforced Concrete Beams in Metric Units, 141

CONCRETE BRIDGES
Edge Beam Stiffening of Multibeam Bridges, 164

CONCRETE PILES
Structural Strength of Plain Concrete Bells, 209

CONDUITS (Water)
Cement Mortar Lining of Large Diameter Water Pipelines, 768
Flow in Culverts and Related Design Philosophies, 849
Steel Pipe Design for the Second Los Angeles Aqueduct, 180

CONSERVATION
Conservation and the Engineer, 496
Freeway and Rapid Transit Share Corridor, 160

CONSOLIDATION
Consolidation and Geochemistry of Some Clays, 501
Consolidation Under Electrical-Pressure Gradients, 438
Influence of Temperature Variations on Soil Behavior, 806

CONSTRUCTION
Cellular Cofferdam Design and Practice, 880
Comparative Radioactivities from Nuclear Excavation, 52
Construction Control with Lasers, 317
Construction Planning for a Sea-Level Panama Canal, 543
Construction of Roads and Appurtenances for Dillon Dam, 729
Cost of Concrete Industrial Buildings, 46
Critical Path Resource Scheduling Algorithm, 829
Foundation Cutoff Wall for Allegheny Reservoir Dam, 98
How Contractors Organize Their Cost Estimating and Control, 459
Labor Productivity in the Construction Industry, 776
Morrow Point Dam Completed, 710
Newport Bridge Foundations, 816
Planning Construction of Four-River Basin Project, 454
Portage Mountain Dam Conveyor System, 734
Problems in Design and Construction of Earth and Rockfill Dams, 676
Research Needs Regarding Sediment and Urbanization, 250
Soil-Cement Pipe Bedding: Canadian River Aqueduct, 216
Statistical Quality Control in Highway Construction, 838
Structural Design of the Bay Area Transit System, 218
Universal Programs—Third Generation Systems for Third Generation Computers, 135
Verrazano-Narrows Bridge: Fabrication and Construction of Superstructure, 851

CONSTRUCTION EQUIPMENT
1,000-Ton Portable Crane Lifts Nuclear Reactor Vessel, 604
Soft-Ground Tunnels for BART, 465

CONSTRUCTION INDUSTRY
Labor Productivity in the Construction Industry, 776

CONSTRUCTION MATERIALS
602-Ft-High Lightweight Concrete Building in Australia, 831
Brazilian Link in Pan-American Highway, 747
The Ideal Multifunctional Constructional Material, 557
New Technology in Low-Income Housing?, 31
Post-tensioned Slabs with Dropped Panels for Structural Integration of Long-Span Parking and Office Floors, 339

CONSTRUCTION PROCEDURE
Bracing and Forming: Key to Fast Subway Construction, 711
Expanding Flume for Sewer Break-In, 844
First Orthotropic Bridge Deck Paved with Epoxy Asphalt, 367
Membrane Linings for Canal Construction, 328
Monopod, 183
Precast Boxes Stacked to Build 496-Room Hotel in Nine Months for HemisFair, 283
Prefabricated Steel Buildings, 535
Surveys and Layout for TVA's Nickajack Project, 122
Timing is Key to Boeing 747 Project, 807
World's Longest Orthotropic Section Feature of San Mateo-Hayward Bridge, 349

CONSULTANTS
Changes in Consulting Engineering, 24
The Future of Civil Engineering—The Private Consultant's Viewpoint, 280

CONTRACTIONS
Simplified Design for Flume Inlets, 677

CONTRACTS
Unbalanced Bidding Models—Theory, 770

CONVEYORS
Portage Mountain Dam Conveyor System, 734

CORROSION
BART Tube Ventilation Building, 751
Evaluation of Concrete for Desalination Plants, 238
List of Sources of Information on Pipeline Design, 653

COSTS
Behavior of Structures in the Caracas Earthquake, 54
Cost of Concrete Industrial Buildings, 46
How Contractors Organize Their Cost Estimating and Control, 459
Labor Productivity in the Construction Industry, 776
New Technology in Low-Income Housing?, 31
Optimization of Wind Bracing in a Tower, 832
Solar Distillation in Australia, 534
Tunnel Liners for BART Subways, 456
Upgrading Intersections for Safety, 66

CRITICAL PATH METHOD
Critical Path Resource Scheduling Algorithm, 829

CULVERTS
Flow in Culverts and Related Design Philosophies, 849
Forces on Rigid Culverts Under High Fills, 366
Giant Culvert in the Tehachapis, 441

CURVED BEAMS
Program for Yield-Point Load of Arches, 573

CYCLIC LOADS
Design of Steel Structures for Fatigue, 926

DAMS
Bibliography on Chemical Grouting, 476
Cellular Cofferdam Design and Practice, 880
Construction of Roads and Appurtenances for Dillon Dam, 729
Evaluation of Dam Safety in California, 149
Foundation Cutoff Wall for Allegheny Reservoir Dam, 98
Hydrodynamic Pressures on Dams During Earthquakes, 532
Hydrologic Engineering Prior to 600 B.C., 445
Improving Aeration at an Underflow Dam, 282
Inflatable Dams, 48
Influences on Selection of the Type of Dam, 574
Surveys and Layout for TVA's Nickajack Project, 122
Water Pressure on Dams Subjected to Earthquakes, 133

DAMS (Arch)
Deformation Measurements of Flaming Gorge Dam, 208
Morrow Point Dam Completed, 710

DAMS (Concrete)
Morrow Point Dam Completed, 710

DATA PROCESSING
Processing Streamflow Data, 336

DATA SYSTEMS
The BEST Approach to Engineering Design, 682

DEFLECTION
Analysis of Circular Steel Multistory Frameworks, 76
Analysis of Multispan Suspension Bridges, 787
Annular Slabs in Circular Core Buildings, 271
Bending of Sandwich Plates with Large Deflections, 618
Chart for Determining Equivalent Single-Wheel Loads, 914
Deflection Coefficients for Steel Beams, 774
Deformation Measurements of Flaming Gorge Dam, 208
Elasto-Plastic Bending of Rectangular Plates, 230
Equivalent Uniform Load for Beam Deflection, 731
Evaluation of Cougar Dam Embankment Performance, 750
Frame Analysis Including Change of Geometry, 602
General Solution of Suspended Cable Problems, 118
Large Deflections and Stability of Elastic Frames, 704
Multispan Suspension Bridges Under Lateral Loads, 399
Numerical Analysis of a Beam Under Tension, 598
Pavement Performance as a Basis for Design, 179
Pipeline Economy Through Design of Backfill, 537
Reinforced Concrete Beams Subjected to Repeated Loads, 415
Seasonal Variation in Flexible Pavement Deflections, 920
Shakedown Analysis of Nonprismatic Beams, 284
Tapered Towers with Variable Wall Thickness, 81
Vibration of Suspension Bridges Under Moving Loads, 326

DEFORMATION
Analysis of Embankment Stresses and Deformations, 443
Deformations of Sand in Hydrostatic Compression, 454
